Drinking Water Filters
MAC 7000 & MAC 7500

Introducing the MAC 7000 & 7500

There is nothing quite like a glass of great tasting water. The MAC 7000 and MAC 7500 make drinking water taste great, and great water makes everything else taste better too, including your favourite drinks and recipes.

Your water, your choice

We all want the drinking water in our homes to be of the highest possible quality. The MAC 7000 and MAC 7500 drinking water filters offer a cost effective and stylish solution to provide your home with clean, refreshing drinking water.

Both models sit neatly under your kitchen sink and eliminate unwanted taste, odour, chlorine and sediment from your drinking water.

In addition, the MAC 7500 also removes heavy metals such as lead, volatile organic compounds (pesticides) and cysts, including cryptosporidium.

A filter for every application

Our MAC range of drinking water filters make it easier than ever to get great tasting water on tap 24 hours a day, 7 days a week.

Model 7000 5 Micron	Model 7500 1 Micron
Taste	Taste
Odour	Odour
Chlorine	Chlorine
Sediment	Sediment
* Kinetico Drinking Water Filters use activated carbon media to significantly reduce a wide variety of contaminants	Lead
	VOC
	Cysts
	MTBE

Complete unit dimensions H 425mm x W 155mm x D 100mm.

Let's keep things simple

With all of our drinking water solutions, filter cartridge changes are a snap with our unique design. Just a quick twist makes installing a new filter cartridge as easy as can be. It really is that simple to enjoy great tasting water in your own home.

No more filter jugs or bottled water

Filter jugs are slow, clumsy and produce limited quantities of water. Tap mounted filters are unattractive and awkward, and bottled water is expensive and cumbersome. Kinetico drinking water filters eliminate the problems associated with such quick fixes at a fraction of the cost per litre and provide clean, refreshing drinking water 24 hours a day, seven days a week.

Model	Cost per litre*
MAC 7000	2p
MAC 7500	4p

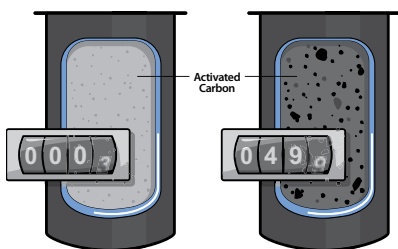

* Typical cost to treat drinking water based on RRP 05/08.

Plus, without the regular disposal of plastic bottles you will be helping the environment.

MacGuard™

Both the MAC 7000 and the MAC 7500 drinking water filters are equipped with the MacGuard™ (Metered Automatic Cartridge) monitoring device. This built-in patented device offers the ultimate in protection for your water's quality as it measures the amount of water your unit has filtered and will shut down the system when it has reached its 1850 litre capacity. For the average household this could be up to 12 months worth of filtered water before the filter cartridge needs changing.

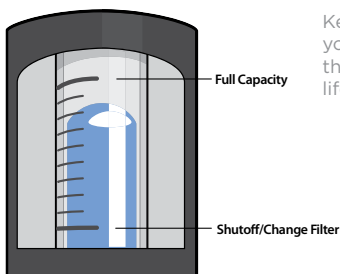

Without the MacGuard™ monitoring system filters can be overused and lose their filtration properties. MacGuard™ ensures you and your family will never drink a drop of unfiltered water.

The MacGuard™ system monitors your filters filtration capacity so you don't have to.

PureMometer™

The MAC range of drinking water filters are also equipped with the PureMometer™, a filter life indicator which shows you how much filter capacity remains, so you know when it is time to replace your filter cartridge.

Keep an eye on the life of your filter cartridge with the PureMometer™ filter life indicator.

Everything you need...

The MacGuard™ Drinking Water Filters are easy to fit and come with full instructions and everything you need to carry out the installation yourself, including our standard drinking water tap (you will need to drill a 15mm hole in your work surface or sink to mount the tap), hose, all push-fit connections and a self piercing tap, to tap into the mains water supply.

- MacGuard™ metering system
- Quick disconnect filter cartridge
- Standard lead free tap
- Tubing and push-fit connections
- Self piercing tap

Add a little bit of style

At Kinetico we pride ourselves on the small details. That is why we offer a range of decorative lead free drinking water taps (available as an optional extra) for you to choose from to best compliment your kitchen's décor.

We have 8 finishes available:

Classic Chrome
