

Everything you need:

The Aqua range of drinking water filters are easy to fit and come with full instructions and everything you need for a quick and easy installation. Included in your Aqua pack is our standard drinking water tap (you'll need to drill a 15mm hole in your work surface or sink to mount it), a hose, all push-fit connections and a self-piercing tap to connect to your mains water supply.

Your Aqua pack contains:

- MacGuard™ metering system
- Quick disconnect filter cartridge
- Standard lead-free tap
- Tubing and push-fit connections
- Self-piercing tap

Add your own style:

At Kinetico, we pride ourselves on the small details too. That's why we offer a complete range of decorative, lead-free drinking water taps (available as an optional extra) so you can choose the best finish to compliment your décor.

5 beautiful tap finishes to choose from:

- Classic Chrome
- Brushed Nickel
- Bright Nickel
- Polished Brass
- Arctic White

- Reduce risk of consuming lead and pesticides
- Fitted MacGuard™ filter
- Easy to use and install

ULTRA-FILTERED WATER

AquaGuard - Drinking Water Filter

Ultra-filtered water

The AquaGuard gives you delicious, ultra-filtered water on tap, with an extra level of protection for all the family!

With a 1 micron block carbon filter AquaGuard eliminates sediment, chlorine, pesticides and insecticides, as well as lead and cysts.

No more filter jugs or bottled water:

Filter jugs are slow, clumsy and produce limited quantities of water, tap mounted filters are unattractive and awkward and bottled water is expensive and cumbersome.

So, it's good to know that Kinetico drinking water filters eliminate all these problems and give you delicious, filtered water at a fraction of the cost per litre.

With a Kinetico AquaGuard, you can enjoy clean, refreshing drinking water on tap, **24 hours a day, seven days a week!**

Great tasting water:

The AquaGuard produces great tasting, clear water that's perfect for drinking, preparing food and cooking.

Independently certified filter:

Unlike many other carbon filters, the AquaGuard has been independently tested and certified to NSF International Standard 42.

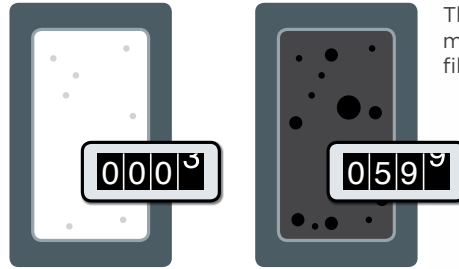

Simple, easy and economical:

Kinetico water filters fit easily and neatly under the kitchen sink and our unique 'twist and lock' system means that changing filters couldn't be simpler. The AquaGuard does not require electricity, which makes it economical to use too.

Peace of mind:

Every Kinetico filter is fitted with a MacGuard™ (Metered Automatic Cartridge) so unfiltered drinking water can't be consumed. This unique device measures the amount of water passing through each filter and stops the flow of water when the filter cartridge is exhausted.

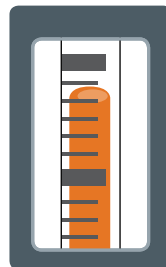

The average household can enjoy up to 12 months' great tasting, filtered water before the filter needs changing.

The MacGuard™ monitors the filtration capacity.

Easy filter metering system:

The Aqua Guard is also fitted with a **PureMometer®**, our revolutionary filter life indicator, which will tell you when your cartridge needs replacing. No fuss, just hassle-free filtered water.

The PureMometer® indicates the life of your filter.
