Environmentally yours:

Kinetico continues to develop systems that are acknowledged as the most efficient drinking and water softening products available.

We also have a philosophy to lessen our impact on the environment, to conserve energy and to engineer with an eye on sustainability. We're committed to this social responsibility policy and we strive to meet it every day.

AQUAScale

Drinking Water Filter

- Remove impurities
- Improve taste, smell and colour
- Keep your kettle in perfect order
- Easy to change filter cartridges
- Filtered water from only 3p per litre

REDUCE LIMESCALE

AquaScale - Drinking Water Filter

Reduce limescale

The AquaScale makes drinking water taste great and eradicates the problems caused by limescale.

The AquaScale filter reduces the hardness ions, calcium and magnesium, in your water and eliminates limescale build-up in your kettle, iron and food steamer, keeping them in pristine condition for longer.

Efficient and economical to run:

The AquaScale does not require electricity, which makes it economical to use too.

High quality filtered water:

Mains tap water, although safe to drink, doesn't always taste as good as it could. Chlorine and sediment affect the smell and taste of tap water, while calcium and magnesium in your water supply can cause limescale to build up and shorten the life of your appliances.

The AquaScale uses a combination of resin and activated carbon to reduce hardness, chlorine and other contaminants, leaving you with just great tasting water.

No more filter jugs or bottled water:

Filter jugs are slow, clumsy and produce limited quantities of water, tap mounted filters are unattractive and awkward and bottled water is expensive and cumbersome.

So, it's good to know that Kinetico drinking water filters eliminate all these problems and give you delicious, filtered water at a fraction of the cost per litre.

With a Kinetico AquaScale, you can enjoy clean, refreshing drinking water on tap, **24 hours a day, seven days a week!**

Great tasting water:

The AquaScale produces great tasting, filtered water that's perfect for drinking, preparing food and cooking.

Simple to use, easy to install:

Kinetico water filters fit neatly under the kitchen sink and are remarkably easy to fit. Your AquaScale pack comes with full instructions and everything you need to install your filter.

Included in your pack is our standard drinking water tap (you'll need to drill a 15mm hole in your work surface or sink to mount it), a hose, all push-fit connections and a saddle valve to tap into your mains water supply.

Easy to change filter cartridges:

Our unique 'twist and lock' system means that changing filters couldn't be simpler.

You'll only need to change your filter cartridge when you notice limescale returning to your kettle.
