Your Water. Perfected.

eVOLUTION Refiners

Wake your senses

An EcoWater eVOLUTION Refiner brings you the best water softening technology, while the integrated active carbon filtration makes sure you'll have the finest water quality possible.

EcoWater eVOLUTION Refiner: wake your senses

With an EcoWater eVOLUTION Refiner, you benefit from superior water softening technologies. With the addition of active carbon, it removes unpleasant odours, colours and tastes from the water.

Your pipes, domestic appliances and boiler will be protected against limescale while you enjoy the finest water quality without any chlorine odours.

An eVOLUTION Refiner ensures you always have soft, luxurious water when you need it.

Our best technology perfected

EcoWater Systems is one of the world's leading domestic water softener manufacturers. Its advanced water softening technology and unique smart software provides the ultimate in reliability, efficiency and convenience.

Smart water technology

The EcoWater eVOLUTION range enables you to choose the unit that matches your requirements perfectly. We don't do "one size fits all".

With EcoWater's unique smart water treatment technology, you will have the most economical unit when it comes to water and salt consumption. Our Refiners are up to 50% cheaper to run than conventionally-controlled water softeners. Recoup your investment in a minimum of time, while you enjoy the convenience of soft water every day.

Use Wi-Fi for your convenience and peace of mind!

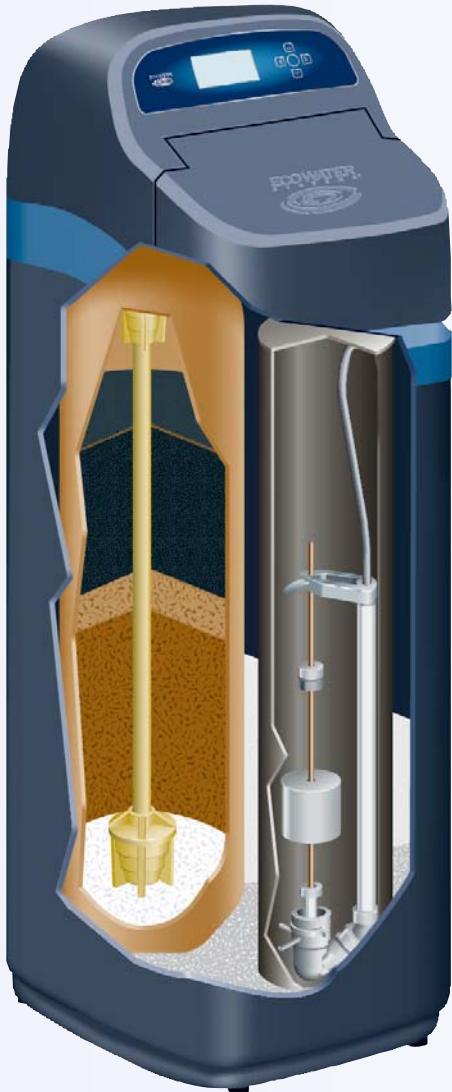

The standard Wi-Fi function allows you to connect your eVOLUTION Refiner to your Wi-Fi network* for convenient monitoring and management with your PC, tablet or smartphone from virtually anywhere, through the EcoWater Hydrolink Plus® web platform.

The simple and secure online dashboard provides appliance information and enables you to monitor and control your unit. Moreover, you can receive warning messages by text message or e-mail, for example if the salt level is too low.

You have the option to grant remote access to your Refiner to EcoWater's technical support team. This way, a first diagnostic can be made with no need for a service call-out or for you to stay at home.

* Connectivity depending on compatibility of your private Wi-Fi network. No connection possible through public Wi-Fi networks. eVOLUTION Refiners also work perfectly well without a Wi-Fi connection, without any loss of performance.

Filtration using active carbon

Removes chlorine odours and improves taste, with enough active carbon for the unit's average working life.

Smart

Your softener is managed by smart software and will adapt itself automatically to optimal settings based on your personal water consumption.

Easy

The salt level is measured in real time. A light will illuminate the salt tank when opening the lid.

Reliable

Valve made from exclusively corrosion free materials to avoid wear and tear.

Tablet salt

Considerably cheaper than block salt.

Elements removed or reduced by active carbon**

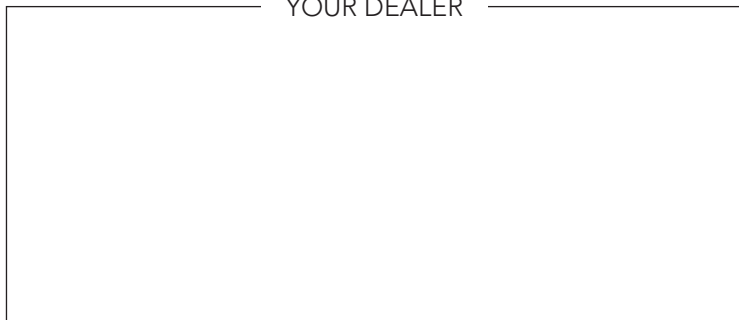

- Chlorine
- Large organic molecules
- Ozone
- Trihalomethanes
- Carbon tetrachloride
- Tetrachloroethylene
- Toluene
- Trichloroethane
- Vinyl chlorides
- Methyl tert-butyl ether (MTBE)
- About 50 volatile organic chemicals (VOC)
- Pesticides
- Phenol
- Herbicides
- Benzene
- Solvents
- Xylenes

** Strictly indicative list based on information submitted by providers of active carbon, EcoWater Systems and internet search. The actual reduction/removal of contaminants depends on many factors (temperature, contact time, pH, level of contamination, etc.) and can only be confirmed by lab testing.
